

500v solar DC water pump

What is a 500 watt solar water pump?

A 500 watt solar water pump is a 48V DC motor pump with a maximum head of 45~109m (145~355ft) and a maximum flow of 449~1321 gallons per hour. It has an inlet diameter of 3 inch/4 inch and an outlet diameter of 0.75 inch/1.25 inch. This solar water pump can be used for deep well, small fountain, large pond, or water tank applications.

What is a solar drive for water pumps?

A Solar Drive (for water pumps) is a type of electrical converter (essentially solar-powered VSDs) which converts the variable direct current (DC) output of a photovoltaic (PV) solar panel into alternating current (AC) that can be used by a local electrical water pump motor (also still allows for an AC input supply if required).

What is a solar water pump controller?

[High-quality controller]: The solar water pump controller utilizing MPPT technology to ensure maximum flow is delivered under all light conditions. It also protects the submersible pump from frequent start up in low light conditions, overheating & running dry with LED display to view working various condition.

How high can a solar well pump go?

Head: 120m (393ft) · This solar well pump is built with rust-resistant 304 stainless steel, the pump is highly resistant to corrosion. · The high-precision rotor and NSK bearing can reduce friction for long-time use. · Powerful flow with 7.9 GPM and the highest head can reach 393ft. More convenient and efficient to use water.

How a solar water pump works?

[Intelligent Water Shortage Sensors]: This solar water pump has an intelligent water shortage sensor, so it has an intelligent water shortage protection function. When there is no water in the well, the pump will automatically stop working. [Pump Motor]: The solar pump use NSK bearing with permanent magnet brushless synchronous motor.

What is the maximum head of a solar well pump?

Max. Head: 120m (393ft) · This solar well pump is built with rust-resistant 304 stainless steel, the pump is highly resistant to corrosion. · The high-precision rotor and NSK bearing can reduce friction for long-time use. · Powerful flow with 7.9 GPM and the highest head can reach 393ft.
