Can a 60-megawatt solar plant supply electricity to Bandar Seri Begawan?

The study says a 60-megawatt solar plant has enough capacity to supply electricity to the district, assuming 49 gigawatt hours in yearly demand and annual generation of 78 gigawatt hours, and even to transfer surplus electricity to the capital, Bandar Seri Begawan.

What is the yearly PV generation capacity in Temburong District?

If 60 MW of PV is introduced in Temburong district, the yearly PV generation is 78 GWh, which exceeds the annual electricity consumption in Temburong district. On the other hand, when the interconnection is used to supply the surplus reserve, Brunei's connectable capacity is 335 MW, accounting for 28% of the total generation capacity.

Which VRE power station is installed in Brunei?

Currently, the only vRE power station is Tenaga Suria Brunei (TSB) Power Station with an installed capacity of 1.2 MW. The installed capacity portfolio in Brunei is shown in Figure 2.13. The ratio of vRE is approximately 0.1% only and gas-fired thermal power accounts for most of the total installed capacity.

Will Eria develop a Temburong ecotown in Brunei Darussalam?

ERIA has been studying the development of an ecotown in Temburong district per request from Brunei Darussalam. Brunei Darussalam is expected to start developing the Temburong ecotown according to the Temburong Ecotown Master Plan in Brunei Darussalam, prepared by ERIA and Nikken Sekkei Civil Engineering Ltd in 2018.

How many electric utilities are there in Brunei Darussalam?

There are two electric utilities in Brunei Darussalam: the Department of Electrical Services (DES), which is a state enterprise, and the Berakas Power Company Sdn Bhd (BPC), which is a private enterprise. Figure 2.13 shows the organisational structure of Brunei's electricity sector.

What role does Berakas play in improving power stations' efficiency?

The Department of Electrical Services and Berakas Power Company play major roles in improving power stations' efficiency, including by using combined-cycle turbines and co-generation power plants, whilst phasing out single-cycle power stations and carbon-intensive diesel-powered plants. 4.
