What Is an Uninterruptible Power Supply (UPS)? Most modern houses are stuffed with electrical devices. They all add to our convenience and it is hard to imagine our life without them. However, electronic equipment is very sensitive to an unstable line voltage and power surges. The perfect solution to this issue is an uninterruptible power ...

Unlike a backup generator, it does not need to power up in order to start generating power. In other words, if you experience a power outage in your area, your machinery should not shut down if it is plugged into a UPS battery backup. Many models of uninterruptible power supply USP also provide surge protection.

What is a UPS (Uninterruptible Power Supply)? An Uninterruptible Power Supply (UPS) is a device that provides emergency power to connected equipment when the main power source fails. It offers immediate protection from power interruptions by supplying power from a separate source, typically batteries. Key Functions of a UPS. Power Backup ...
