

Berlin home solar system

What is solarzentrum Berlin?

To start tapping more into the potential of solar energy, both in the private and the public sector, the SolarZentrum (solar centre) Berlin was opened in May 2019. It is a component of the "Masterplan Solarcity", which works as an independent advisory centre on the topic of solar energy (SolarZentrum Berlin, only in German).

How many photovoltaic systems are there in Berlin?

Compared to solar thermal energy, there are far more photovoltaic systems registered in Berlin. As of July 7, 2023, 20,985 systems were in place, with a total installed capacity of around 230 MWp.

How much solar power does Berlin have?

According to the master plan study for the "Masterplan Solarcity Berlin", the State of Berlin owns 5.4 % of Berlin's buildings. Their roof surfaces account for 8.3 % of the solar potential (SenWEB 2019). On the public buildings in Berlin, there are 691 PV systems with a total installed capacity of 42.1 MWp (as of April 1, 2023).

Can solar energy be used in Berlin?

So far, solar energy has been used more heavily in boroughs on the periphery. There are, however, many potential areas in the remaining parts of the city. Here you can peruse detailed information on the long-term potential of solar energy use in Berlin.

Are solar panels mandatory in Berlin?

The set of measures stipulated in the master plan is accompanied by the Berlin solar law. Solar panels have been mandatory since January 1, 2023. The installation and operation of photovoltaic systems have been mandatory since then for new and existing buildings under certain conditions (SenK 2021).

Does Berlin have a solar calculator?

As part of updating Berlin's Energy Atlas, the frequency and quality of the data on solar systems, especially those with photovoltaics, will continually be optimised. Since May 2022, a digital version of the solar calculator has also been available as one of the measures of the "Masterplan Solarcity" (SenWEB 2019).

ST potential: analysis of Berlin's solar potential, IP SYSCON, commissioned by the SenWEB, as of December 8, 2021
Postal code areas: data as of June 30, 2023
It may safely be assumed that not all solar systems installed in Berlin are known, also in relation to the respective year of recording.

"With this PV system, we are setting an example for more sustainability and making a contribution to the energy transition," says Georg Garlichs, CFO, ESMT. "The visually discreet implementation shows that solar installation and historic preservation can go hand in hand. And, of course, the PV system is also a good economic investment."

Berlin home solar system

Generate your own clean energy whenever the sun is shining with Tesla solar panels. Power everything from your TV to the internet with solar energy. Save excess solar energy in Powerwall for use during storms and outages, or when utility prices are high. Charge your electric vehicle with clean energy at home using Mobile Connector or Wall ...

Meteorites are ancient messengers of the solar system, 4.5 to 4.6 billion years old. They witnessed the formation of our planets. Their composition allows researchers to draw conclusions on the history of our planetary system. The Museum für Naturkunde owns the largest collection of meteorites in Germany.

Starting 2023, Berlin plans to make solar energy systems compulsory for climate protection in accordance to the Berlin Solar Act. New buildings are mandated to install a photovoltaic (PV) or solar system on their ...

Je nach Bundesland gibt es unterschiedliche Regelungen. Berlin als größte Stadt Deutschlands mit 3,6 Millionen Einwohnern hat natürlich andere Anforderungen als eines der ländlichen Bundesländer. Ab dem 01. Januar 2023 gilt in Berlin eine Solarpflicht, die im Solargesetz 2021 festgelegt wurde.

Generate, store and consume CO2-free solar power yourself - even in winter. With the new generation. picea 2. picea is unique. The first year-round electricity storage system for your home. There is nothing comparable on the ...

A part of a so-called balcony solar panel is pictured at a balcony of a private living house in Berlin on January 3rd, 2025. Photo by Tobias Schwarz / AFP

Germany now has some 44 manufacturers of home energy storage systems. Germans have installed solar-panel arrays on more than 1 ...
