

# Brand new outdoor power supply field in Ljubljana

Why do we distribute electricity to the largest part of Slovenia?

We distribute electricity to the largest part of Slovenia and provide the longest network of power line routes, the most metering points in terms of network length (31 per km), up to 43 kW and more connected loads, while also covering the area with the greatest share of forest land, which comprises 67% of the whole supply area.

Who is Elektro Ljubljana?

Elektro Ljubljana operates the largest distribution network in Slovenia. With electricity infrastructure that covers 6,166 km<sup>2</sup> (30.4 % of the country) we make sure that electric power reaches every part of central and southeast Slovenia.

What percentage of electricity is produced by hydroelectric power plants in Slovenia?

Hydroelectric power plants, which operate under the patronage of Dravske elektrarne Maribor and Soske elektrarne Nova Gorica, produced as much as 88 percent of all "green" electricity in Slovenia. This is due to good hydrological conditions and the high availability of the power plants throughout the year.

How does Elektro Ljubljana connect to the transmission network?

Elektro Ljubljana's distribution network is connected to the transmission network via the following points of supply: DTS 400/220/110 kW Bericevo, DTS 220/110 kW Klece, DTS 110/35 kW TET in DS 110 kW Hudo. We operate distribution transformer stations (DTS), distribution stations (DS) and transformer stations (TS) with varying voltage levels:

Which hydroelectric power plants will be located in Trbovlje?

In the first phase, the hydroelectric power plants Suhadol, Trbovlje and Renke will be located in the area. With their production of 350 GWh, these will replace half of the electricity production from the former Trbovlje thermal power plant, which operated at a nearby location.

How much electricity does HPP Mariborski otok produce?

The power on the threshold of HPP Mariborski otok is 60 MW, which is comparable to solar panels on 40 football fields. The pumped HPP Avce has a flow of 640 Olympic pools of water every day. The chain of HPPs on the Drava produces 0.7 million households of electricity every year.

A solar battery costs \$8,000 to \$16,000 installed on average before tax credits. Solar battery prices are \$6,000 to \$13,000+ for the unit alone. The following factors impact the cost of a ...
