

# Cebu Energy Storage Power Solutions Company in the Philippines

Who owns Cebu Energy Development Corporation (CEDC)?

Cebu Energy Development Corporation (CEDC) owns and operates a 246 MW clean coal-fired power plant located in Toledo City, Cebu. CEDC is a consortium composed of Global Business Power, Aboitiz Power Corporation, and Vivant Energy Corporation with Formosa Heavy Industries Corporation providing the design and supply of CEDC's equipment.

Where is the Cebu Energy power station located?

Cebu Energy power station is located in Toledo City, Cebu, Central Visayas, Philippines. The map below shows the exact location of the power station. Loading map... The 246 MW Cebu Energy power station consists of 3 x 82MW coal-fired generators.

What is Masinloc battery energy storage?

We started our venture into battery energy storage technology in 2018 when we acquired the 10 MW Masinloc Battery Energy Storage System (BESS) of the Masinloc Power Plant from AES Philippines. The Masinloc BESS is the first battery energy storage facility in the Philippines and one of the first in Southeast Asia.

How is Bess transforming the Philippine energy industry?

With the commercial operations of approximately 1,000 MW of BESS facilities across 32 locations in the Philippines, we are now ushering in a new era for the Philippine energy industry through significant improvements in grid reliability and the integration of more renewable power sources to the country's diverse energy mix.

How will a solar power plant help the Philippines?

The 187-hectare solar power plant, which is a kilometer away from Talisay substation of the National Grid Corporation of the Philippines, will generate around 280 gigawatt-hours of clean energy annually that can serve 300,000 people. The project will also cut 259,000 tons of carbon dioxide emission annually.

How many Bess facilities are there in the Philippines?

We are operating BESS facilities at 32 locations in the Philippines, across the regions of Luzon, Visayas, and Mindanao. Overall, we are putting up approximately 1,000 MW of BESS facilities, which will help ensure the reliability of the grid, especially in areas that are in most need of power quality solutions.
