

What is a compact inverter system?

INVERTRONIC compact inverter systems and their racks, comprising hot-swapping 1/5 19" rack modules with a range of 3 heights, are characterised by their modular architecture. Electronic bypass switch assures system availability, enables interruption-free switching and is available in two power ratings.

What types of inverter modules are available?

The inverter modules are available for various input and output voltages, and the output power varies according to the voltage combination. INVERTRONIC compact inverter systems and their racks, comprising hot-swapping 1/5 19" rack modules with a range of 3 heights, are characterised by their modular architecture.

How do I switch the load to the inverter output?

There is the option of switching the load to the bypass mains or to the inverter output, thanks to the manual bypass which is also housed in a 1/5, 19" rack module. System cabinets are available in a range of different sizes, coming with the required number of racks for inverters and for rectifiers.

The AC-based CPS is built on Eltek's 25/50kW Inverter Module providing high efficiency power conversion, redundancy and hot-swap capability. Each cabinet can be configured up to 200kW/450kW, and with system scalability up to ...
