

Ct200h high voltage inverter

High voltage electricity powers the electric motor, generator, air conditioning compressor and inverter/converter. All other automotive electrical devices such as the headlights, radio, and gauges are powered from a separate 12 Volt auxiliary battery. Numerous safeguards have been designed into the CT200h to help ensure the high voltage,

If so the part that is interesting to increase would be the DC/DC converter, as it supplies power to the 12V system from the high voltage hybrid battery. I think the Toyota ...

I suspect that it might control the inverter cooling pump. But I haven't been able to locate it in any of the exploded parts diagrams. Our problem seems intermittent. We had it to the dealership service center. They performed the inverter module recall replacement, and said the warning was gone.
