48V to 230V inverter, pure sine wave Converters AC/AC, DC/AC & DC/DC Inverters. An inverter converts a 48 Volt DC voltage (battery) into an AC voltage (230V-50Hz). Stable 230V with pure sine wave. The standard output voltage is 230 Volt, 50Hz with a pure sine wave. This means that this inverter supplies the same type of voltage as the wall socket.

The electrical circuits that transform Direct current (DC) input into Alternating current (AC) output are known as DC-to-AC Converters or Inverters. They are used in power electronic applications where the power input pure 12V, 24V, 48V DC voltage that requires power conversion for an AC output with a certain frequency.
