Where is Europe's largest supercapacitor production facility located?

The Estonian battery specialists from Skeleton Technologies are building Europe's largest supercapacitor production facility in Saxony with the support of Siemens. Skeleton Technologies is investing 220 million euros in the now announced new production facility in Markranstädt near Leipzig in Saxony.

Who makes a supercapacitor?

Sign up for the Daily Brief, Silicon Republic's digest of essential sci-tech news. The EUR220m supercapacitor factory by Estonia's Skeleton will be designed by Siemens and produce up to 12m cells a year.

What are supercapacitors & ultracapacitor?

Supercapacitors or ultracapacitors offer unique advantages like ultrafast charging, reliable operation spanning millions of duty cycles alongside wide operating temperatures and collaborative integration with batteries or fuel cells for energy storage applications.

Where is skeleton's new supercapacitor factory based?

The new EUR220m supercapacitor factory will be designed by Siemens and based near Leipzig in Germany. Production is set to begin in 2024. Siemens' technology is expected to complement Skeleton's patented 'curved graphene' material in lowering production costs.

Are supercapacitors a key element in reducing emissions?

Supercapacitors are a key element in drastically reducing emissions in these sectors." The factory in Markranstädt will produce up to 12m cells a year and have an output 40 times greater than Skeleton's other site in Saxony, which will continue as an R&D factory in the future.

What are Elna America supercapacitors?

ELNA America supercapacitors lineup includes commercial and automotive grades: DZ series - Slim profile screw terminal supercapacitor modules rated from 25F to 200F at 2.3V primarily aimed at peak power assist and backup across industrial segments.
