STARELO 30 Amp Generator Power Inlet Box NEMA L14-30P,125/250 Volt 7500W, Outdoor dustproof and Weatherproof for generators, Welding Machines, etc.ETL Listed.

How do you plug a portable generator into a power inlet box?

When the power goes out,you can connect your portable generator to a power inlet boxby plugging one end of a power cord into the generator's outlet and the other end into the inlet box. It's as simple as plugging in outdoor holiday lights.

How does a portable generator work?

A portable generator works by connecting one end of a power cord to your portable generator outletand then plugging in the other end to the power inlet box installed on your house. When the power goes out,your manual transfer switch restores power to your main electrical panel.

What does a power inlet box connect to?

A generator inlet box,also known as a power inlet box,is like an electrical outlet for your house. It'll allow you to connect your portable generator with the manual transfer switch in your basementquickly and easily.

What should you connect the generator to in the garage?

If your main electrical panel is installed in your garage,you don't need a generator. You simply need at least a 25-foot power cord and a manual transfer switch with an outlet. Then,connect the generator directly into the transfer switch through the garage.

How does a manual transfer switch work with a portable generator?

When connecting a manual transfer switch to a portable generator,the generator inlet box serves as the linkthat allows power to flow into your essential circuit and power your house.
