What is a flywheel energy storage system?

Flywheel energy storage systems (FESS) are a great way to store and use energy. They work by spinning a wheel really fast to store energy, and then slowing it down to release that energy when needed. FESS are perfect for keeping the power grid steady, providing backup power and supporting renewable energy sources.

How long does a flywheel last?

Flywheels can be expected to last upwards of 20 years and cycle more than 20,000 times, which is high in comparison to lead-acid (2,000 cycles), lithium-ion (<10,000 cycles) and sodium-sulfur batteries (2,500-6,000 cycles). Another advantage is the flywheel energy storage system's ability to provide energy with little start up or transition time.

What is the difference between a flywheel and a battery storage system?

Flywheel Systems are more suited for applications that require rapid energy bursts, such as power grid stabilization, frequency regulation, and backup power for critical infrastructure. Battery Storage is typically a better choice for long-term energy storage, such as for renewable energy systems (solar or wind) or home energy storage.

Could flywheels be the future of energy storage?

Flywheels, one of the earliest forms of energy storage, could play a significant role in the transformation of the electrical power system into one that is fully sustainable yet low cost.

How much energy does a flywheel store?

Indeed, the development of high strength, low-density carbon fiber composites (CFCs) in the 1970s generated renewed interest in flywheel energy storage. Based on design strengths typically used in commercial flywheels,  $\rho \omega^2 r^2$  is around 600 kNm/kg for CFC, whereas for wrought flywheel steels, it is around 75 kNm/kg.

How does a flywheel retain energy?

Energy Storage: The flywheel continues to spin at high speed, maintaining energy as long as friction and resistance are minimized. The longer it spins, the more energy it holds, similar to how the skater retains rotational energy as they keep spinning.
