Will Kazakhstan gain market share in battery materials?

The country wants to gain market share in battery materials such as lithium, cobalt, manganese, nickel and graphite amid rising demand for the materials, Sharlapayev said. Kazakhstan already mines manganese, but last year it launched processing of manganese sulphate and aims to eventually capture 10% of the global market for the battery material.

Is Kazakhstan a major supplier of uranium and titanium?

Kazakhstan is a major global supplier of both uranium and titanium. It also holds 2% of world nickel reserves, but has, for now, a negligible share in its global output. The country has also yet to tap its deposits of lithium, another key metal, but exploration is underway.

Why is Kazakhstan a dependable supplier of critical materials?

The former Soviet republic promotes itself as a dependable supplier of the majority of critical materials outlined by the European Union, at a time when Russia has threatened to curb exports and China is tightening control over rare earths. Kazakhstan has signed deals with the European Union and Britain on the supply of critical minerals.

Does Kazakhstan mine manganese sulphate?

Kazakhstan already mines manganese, but last year it launched processing of manganese sulphate and aims to eventually capture 10% of the global market for the battery material. It also supplies phosphates for fertilisers and aims to process material needed for LFP (lithium ferro phosphate) batteries that are growing in popularity, he added.

How many mining licences are issued in Kazakhstan?

This has hiked the number of issued licences so far this year to 487 compared to 397 for all of 2023, according to data from the ministry. Major mining companies involved in exploration in Kazakhstan include BHP, Rio Tinto, First Quantum Minerals, Fortescue and Teck Resources.

Why is Kazakhstan launching new EV exploration licences?

By Olzhas Auyezov and Eric Onstad ALMATY (Reuters) - Kazakhstan aims to boost output of metals needed for electric vehicle (EV) batteries and is issuing hundreds of new exploration licences to attract fresh investment in the sector, the country's industry minister told Reuters.

In recent months, cylindrical battery cells have shown huge dynamics in various aspects, especially regarding design and related production technologies. This was mainly triggered by Tesla's Battery Day 2020, where the company presented its new 4680 cell format and announced plans to use it on a large scale. The 4680 battery cell is 46 mm in
