What is a 3rd generation solar cell?

The first generation encompasses crystalline silicon (c-Si) cells, while the second has arrived in the form of thin-film solar cells (TFSCs). Diverse new technologies, such as high-concentration cells, organic solar cells, flexible solar cells, and dye-sensitized solar cells are collectively referred to as the third generation.

What is a high-concentration solar cell?

The most commonly used high-concentration cells have three PN junctions consisting of three different semiconductors [germanium, gallium arsenide (GaAs) and gallium indium phosphide (GaInP)], which can reach an efficiency of up to 40% in scale production. Through packaging, solar cells become solar modules.
