A sophisticated UPS power supply may offer AVR, or automatic voltage regulation. This feature stabilizes incoming AC power so that it is always delivered at 120 volts, without requiring the backup battery to come online. This is useful for preventing a UPS from repeatedly switching between AC and battery power during frequent brownouts.

IOGP S-734D: Procurement Data Sheet for AC Uninterruptible Power Supply (UPS) System (PIP) The procurement data sheet defines application specific requirements, attributes and options specified by the purchaser for the supply of equipment to the technical specification. The procurement data sheet
