The DUPS20 is a 20A DIN rail type DC-UPS module, and it is paired with a power supply and an external battery to achieve the backup function. When the AC mains fails or is interrupted, the load will be immediately connected to the battery pack to avoid interruption and to ensure the continuous operation of the entire system (the operating time depends on the capacity of the ...

What is a UPS Power Supply? A uninterruptible power supply or uninterruptible power source (UPS) is an electrical apparatus that provides you with emergency power to a load when the input power source or mains power fails in cases of power outages or load shedding. A UPS differs from an emergency power system or standby generator as it provides near-instantaneous ...
