

# Nicaragua's new outdoor power supply

What kind of energy does Nicaragua use?

As of 2020, renewables - including wind, solar, biofuels, geothermal, and hydro power - comprise roughly 77% of Nicaragua's total energy supply, with oil providing the remaining 23%.

How has Nicaragua improved its energy supply?

"Transport costs and travel times will be reduced, safety will be improved and employment opportunities will be created." Nicaragua has made good progress improving its energy supply. The country's electrification rate has increased from less than 50 percent in 2002 to around 97 percent in 2019.

What is the national energy policy of Nicaragua?

Further electrification of end-uses, especially transportation, in conjunction with the decarbonisation of electricity generation, is an important pillar of clean energy transitions. The National Energy Policy of Nicaragua establishes a policy framework for the development and exploitation of renewable sources.

How many people are off-grid in Nicaragua?

The country's electrification rate has increased from less than 50 percent in 2002 to around 97 percent in 2019. However, it is estimated that around 600,000 people are still off-grid, particularly in remote rural areas. Nicaragua's National Sustainable Electrification and Renewable Energy Program (PNESER) was launched in 2010.

Does Nicaragua produce oil?

Nicaragua does not produce oil. The country ranks 115th for oil consumption globally, consuming 37,000 barrels daily during 2016 (approximately 0.25 gallons per capita). In 2019, Nicaragua imported US\$506 million worth of refined petroleum and US\$254 million of crude petroleum, primarily from the United States and El Salvador.

What is the OPEC Fund doing in Nicaragua?

In 2017, the OPEC Fund joined forces with the government of Nicaragua - which has prioritized investments in rural roads - to finance the construction of bridges and to upgrade two critical road sections in key agricultural areas in the country's northwest and center.
