

# Outdoor Power Supply Recommendation

What is the best outdoor portable power station?

For the ultimate in outdoor portable power, we recommend the Goal Zero Yeti 1400 Lithium power station. It can recharge a smartphone over 70 times and a laptop over 20 times. Additionally, it can power a refrigerator for over 23 hours or a 32-inch LCD television for 14 hours.

What spec should you consider when buying a power station?

Whatever the reason you are purchasing a power station, the most important spec to pay attention to is watt hours, which is a measurement of how much energy the power station can hold. While a particular power station might claim to hold 1,000 watt hours, the actual amount of usable power you can get out of it is a different story.

How do I choose a battery pack for outdoor use?

When shopping for a battery pack to use in the outdoors, look for one that is durable, protected from the elements, and provides enough energy for the length of your outing. Goal Zero's line of portable battery packs was built from the ground up for use in the outdoors.

How much power can a portable power station hold?

While a particular power station might claim to hold 1,000 watt hours, the actual amount of usable power you can get out of it is a different story. The best portable power stations also have an onboard computer that shows you how much energy is left in your unit, as well as how much power it's currently using.

What can a portable power station power?

Portable power stations can power laptops, radios, and even small appliances while on an extended expedition to some far flung destination. These charging options come in the form of tiny battery packs designed to keep a mobile device operational for a few extra days to portable power stations.

How much power do you need for camping?

The answer to this depends largely on what you intended to do with it. If all you want is backup power for your family's phones while camping over the weekend, you can get away with something relatively small -- 200 watt hours would be more than enough.

Our wattage recommendations leave a healthy amount of headroom to work with a broad range of hardware and peripheral combos. ... \*Please select a 1000W power supply model from the G or GL PCIE5 series.
