Without free electricity supplies from Russia, Abkhazia cannot survive the winter, especially since it has an underdeveloped thermal power system. The energy shortage in the region became more acute after 2020 due to cryptocurrency mining and, subsequently, droughts that exhausted the generating capacity of the Enguri hydroelectric power station.

SUKHUM, February 6. /tass/. The volume of commercial flow of electricity from Russia to Abkhazia, an agreement reached between Chernomorenergo and Inter RAO, will amount to 182 million kWh worth 830 million rubles. This is reported ...

However, after Abkhazia failed to fulfill certain commitments to the Kremlin--such as passing a law allowing Russians to purchase residential property--this "humanitarian supply" ended. Russia now sells electricity to Abkhazia at a market rate of 4 rubles (approximately \$0.04) per kWh. This cost is steep for Abkhazia.

To minimize the stress on the power system, the Abkhazia state-owned power company Chernomorenergo has withdrawn the power supply to 15 mining firms.

Abkhazia photovoltaic energy storage device company. Energy storage | Telzas - Power systems for telecommunications. It is a complete energy storage system with IP20 (Indoor) or IP55 (Outdoor) protection, fully integrated with the power grid, ...
