

# Paris outdoor power supply model difference

Do hotels in Paris have USB plugs?

Few hotels in Paris (4-5 stars) now offer USB plugs and combo electric sockets, or grounded versions in the bathrooms. But do not depend on it, so come along with what you need. Hotels in France, especially in many parts of Paris, will provide adapters to their guests. These hotels are the 4-5 star ones with deluxe class treatments for visitors.

Do hotels in Paris have adapters?

Hotels in France, especially in many parts of Paris, will provide adapters to their guests. These hotels are the 4-5 star ones with deluxe class treatments for visitors. In the case that you are staying at a 5-star hotel, you can be sure that they will have an adapter. But you should not bank on it. Ensure you travel with an adapter at all times.

Does France have a 230 volt electricity grid?

France is not like the U.S. and many other countries. Its electrical grid deploys a voltage of 230 V which suggests that travelers will need to use devices below 220 V. Appliances like irons and blow dryers that produce heat are often ranked at 110V in someplace like the U.S.

Do I need a plug adapter in France?

Not to be stranded, you will need an adapter to connect to power when you visit a place where the socket/plug shapes are different from where you stay. As long as you can identify the type of plug your devices use and the type of sockets used in France, getting the fitting adapter will be easy.

What are the different types of electrical sockets in France?

There are two different types of electrical sockets in France C and E. Type C is ungrounded and it comes with two round holes. But the major difference between the two types is that E comes with a grounding prong that protrudes from the wall. The Type E is mostly found in places that have some links to France.

Does a French outlet need a plug?

Not to have issues with a French outlet, a plug must have some features: a head that can fit into a circular indentation, two circular pins, and either a head or a circular grounding hole. While you will be fine with an adapter that has a little head and two pins, it is better to use one that can fit the grounding pin.

Parc Paris is a tamper-proof power unit in bollard format and provides a reliable and efficient outdoor power supply. It has a classic flat-top with hatch closure that allow passing cable with plug inserted. Steel structure made of AISI 304 ...
