

What are the price trends for n-type recharge & dense polysilicon?

o Price Trends: Prices for N-type recharge and dense polysilicon have risen this week, reaching RMB 41/kg and RMB 40/kg, respectively. With the seasonal peak for PV installations approaching and futures warehouse registrations diverting supply, polysilicon inventory is expected to decline rapidly to healthy levels.

How much does polysilicon cost?

Wafer (Per Pcs.) The mainstream concluded price for mono recharge polysilicon is RMB 41/KG, while mono dense polysilicon is priced at RMB 40/KG and N-type polysilicon is currently priced at RMB 38/KG. o Transaction Dynamics: This week, polysilicon manufacturers have been actively signing new orders.

Does EnergyTrend respond to a manufacturer's price enquiry?

EnergyTrend takes a conservative attitude toward the enclosed price information. All surveyed manufacturers are to be kept anonymous and EnergyTrend will not respond to price enquiry about any individual manufacturer.

How does EnergyTrend provide price information?

The price information provided by EnergyTrend is primarily a result of periodical survey of a pool of major manufacturers via telephone, questionnaires, and site visits. EnergyTrend cross-surveys major buyers and suppliers throughout the supply chain and strives to ensure all enclosed price information reflects actuality.

From next year, anti-dumping duties levied on Chinese suppliers could contribute to a rebound in the falling price of solar glass, according to a new report from IHS Technology.

In terms of cost and profit, due to the rebound in the spot price of soda ash and the weakening of photovoltaic glass prices, the industry's gross profit margin has continued to ...

SINGAPORE (ICIS)-ICIS senior analyst Joanne Wang discusses the recent rebound in China's ethylene vinyl acetate (EVA) prices and gives a brief outlook for 2025. ... EVA producers' Q4 inventory low after destocking in the first three quarters Photovoltaic industry resumes replenishment in Q4, boosting demand ... Photovoltaic industry ...

The high inventory levels pose a challenge to the de-stocking efforts, resulting in difficulties for photovoltaic glass prices to rebound. Currently, PV glass prices have stabilized, and discounts are being offered for bulk purchases. On the supply side, no new PV glass production lines were put into operation last week, maintaining the ...

Solar glass prices continued to climb this week, with 2.0 mm sheets rising 8% to CNY 13.5 (\$1.85) per square

meter and 3.2 mm sheets up 9.8% to CNY 22.5, according to the China Nonferrous...

While it has seen a rebound over the last 2 weeks, the decline for the TOPCon 182 mm cell (down 41.7% YtD) is still disproportionately higher among cell types. Module prices have declined in the range of 23% to 31.8% YtD. And solar glass prices are down in the 23.2% to 35% range YtD.

Tongwei shares responded that the company's component prices are expected to rise, but the specific price increase is temporarily inconvenient to disclose. Jinkosolar and Trina Solar officials said that the company has raised the price of photovoltaic modules, and the price range is 0.01 yuan to 0.03 yuan/watt.

(Yicai) Sept. 5 -- Major Chinese producers of photovoltaic glass confirmed that they are idling furnaces to reduce output in response to a severe supply glut, but industry insiders are unsure ...

The shipment of EVA film increased greatly, and the price rose by 10%. According to the news from SMM Photovoltaic Vision, the shipment of film has increased greatly in July, and the price has ...

Destocking: Destocking activity is "pretty much done" in beer and food, with spirits and wine expected to linger through the middle of this year, CEO Andres Lopez said during an earnings call Wednesday. Glass destocking started later than other categories, Lopez said, and those industries have seen a rebound, which gives O-I confidence ...

On Sept. 6, 002623.SZ said on the interactive platform that the price of photovoltaic glass rebounded due to the rising demand of downstream terminals and the rising prices of raw ...

On March 27th, there was a signal of recovery in the photovoltaic industry. Since hitting bottom in the second half of last year, prices of products such as crystalline silicon photovoltaic modules ...

Auxiliary materials: This week, PV glass prices increase significantly. The mainstream concluded price for 3.2mm glass rise to RMB 28/m², while 2.0mm glass is priced ...

Silicon wafer prices also ran stable this week, of which, N-type G10L monocrystalline silicon wafer transaction average price stabilized at 1.18 yuan / piece; N-type G12R monocrystalline silicon ...

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. ... Module prices in dollar terms are price quotes in non-China markets (before tax), not translated from RMB prices. Stop reporting for monofacial glass-backsheet PERC modules from April 2024 onwards.

Photovoltaic glass destocking prices rebound

The supply and demand gap for Photovoltaic Glass may rebound in Q4 of 2025, with cold repair production only bringing short-term effects, but the trend of tightening supply has been ...

Li Jiahao, an analyst at South China Futures Energy, believes that the supply of electricity in the south is tightening in the early stage, soda ash production enterprises are insufficient, the inventory has accelerated in the past two weeks, and ...

As of July 14, the domestic price for 2.0mm PV coated glass (panel) stands at RMB 17/m², while 3.2mm PV coated glass is priced at RMB 25/m², with both prices remaining unchanged compared to the previous week. This month, the price of photovoltaic glass is lower, primarily due to certain enterprises reducing prices to facilitate shipments.

Cell Prices Continue to Decline; A Potential Rebound can be Seen in PV Glass Prices: published 2023 09 14 16:04 : ... As of July 14, the domestic price for 2.0mm PV coated glass (panel) stands at RMB 17/m², while 3.2mm PV coated glass is priced at RMB 25/m², with both prices remaining unchanged compared to the previous week. ...

In terms of cost and profit, due to the rebound in the spot price of soda ash and the weakening of photovoltaic glass prices, the industry's gross profit margin has continued to decline and has dropped to around 19%, lower than the same period in previous years. Overall, the market has started to negotiate new prices for June this week.

Amid destocking, product prices in all parts of the PV industry chain may bottom out again before the Chinese New Year in early February, while downstream module prices may reach a low point in the first half of next year, ...

This includes inverters, photovoltaic films, photovoltaic glass, silver paste, photovoltaic junction boxes, and ribbon welding. Energy Storage: In 2023, prices of lithium carbonate and silicon materials have fallen, leading to lower prices of battery packs and photovoltaic components, which means a reduction in the cost of developing energy ...

Cell Prices Continue to Decline; A Potential Rebound can be Seen in PV Glass Prices. 2023-09-14 16:04 Polysilicon Polysilicon prices have remained stable throughout the week. The mainstream concluded price for mono recharge polysilicon is RMB 83/KG, while mono dense polysilicon is priced at RMB 81/KG and N-type polysilicon is currently priced ...

Price Trend: N-type wafer prices saw broad-based declines this week. While leading manufacturers attempted to maintain prices, cash flow concerns among smaller players triggered panic selling, with prices dropping by as much as RMB 0.05/piece in some cases. The ...
