Can a power bank charge a laptop?

Power banks that can charge a laptop are a category unto themselves. I recently put together a guide to those high-capacity portable chargers and Lion Energy's Eclipse Mag made the cut as the best option for traveling with your laptop -- but it's also great for smaller devices.

Do you need a power bank to charge your phone?

If you have a newer Android phone, or the latest iPhone models, you'll want a power bank with faster charging speeds to get your battery full faster. You can also find a power bank that charges your phone (or even your Apple Watch) wirelessly.

Why do you need a portable charger?

Learn more. Portable devices have a Murphy's law-like ability to run out of power at the least convenient moment: as you step on the bus, right in the middle of an important meeting, or just as you get comfortable on the couch and press Play. This is why you need the best portable chargers handy, to make all those situations a thing of the past.

How many phones can a 20,000 mAh battery charge?

A 20,000mAh battery can charge two phones twice or a phone twice and a tablet once. Some power banks have enough juice to power laptops. Of course, a higher capacity often translates to a heavier, larger, and more expensive battery. In the end, it's best to assess your typical needs before buying.

How to choose a portable charger for a laptop?

If it's for a laptop you'll want to find a portable charger that has a capacity of at least 20,000 mAh. This is because most laptops have a battery capacity of around 10,000 mAh and take more than this to recharge. More important, however, is charging output wattage. Charging Speed
