

Prices of solar lights for home use in the UK

How much do solar panels cost in the UK?

The average cost of solar panels in the UK, including installation and a battery, ranges between £4850 and £13,000 depending on the size of your household. As of March 2025, for a 3-bedroom house in the UK: Solar panels cost around £9,800 for a 4.5kW system (including installation and a storage battery).

Is it a good time to buy solar panels in the UK?

Combine that with the falling costs of solar battery storage, and the fact the energy price cap rose by a further 1.2% in January 2025 after increasing 10% in October 2024, you'll find that now is a great time to get solar panels in the UK. How much do solar panels cost in the UK?

How much does a solar panel cost per kilowatt?

Exactly how much a solar panel costs per kilowatt depends on the type of solar panel you're talking about. Monocrystalline solar panels are the most expensive, and their cost per kW is somewhere around £1,000 - £1,500 whereas polycrystalline solar panels cost about £900 per kW.

How much do solar panels cost in Northern Ireland?

Solar panels cost around £9,800 for a 4.5kW system (including installation and a storage battery). You'll pay 0 per cent VAT on the cost of your solar panels and installation. Your annual savings, if you have SEG (not available in Northern Ireland) and a solar battery, can range between £870 and £1,043.

How much does a solar panel battery cost?

Some companies only offer 1-2 pence. A battery costs around £5,000 on top of a new solar panel system, according to fitters Heatable. That's a significant extra spend, which means that breaking even on this investment might take longer than buying a solar panel system on its own.

Why do solar panels cost so much?

The number of solar panels required for a solar energy system is a key determinant of the overall cost as it directly influences both the initial investment and long-term financial benefits. More panels naturally lead to higher upfront costs due to the price of the panels themselves.

Project Solar also claims that this solar panel delivers optimal performance in low-light conditions - a concern for many UK homeowners due to the country's famous lack of sunny weather. However, even the improved efficiency rating of 22.65 per cent for this new Project Solar panel is lower than the average of other panels we reviewed, so ...
