What is an emergency portable solar power supply (EPSPs)?

Abstract- This paper proposes an emergency portable solar power supply (EPSPS) by using a renewable energy source. The proposed EPSPS can be used in contingency conditions or in a rural area with non-electric power sources. The system architecture is similar to the existing photovoltaic (PV) system with a portable and user-friendly design.

What is emergency power supply system (EPSS)?

Accreditation standards recommend CIs to have emergency power supply system (EPSS) in order to form a local microgrid network with backup resources (generation units/renewable resources) in case of sudden power blackouts of main grid supply.

How does a portable solar power supply work?

In conclusion, this portable solar power supply can supply electricity collected from non-conventional energy sources which is from solar power. This product can supply electricity to DC and AC appliances and power up to 100W at one time. The system can supply electricity which lasted for 2 days without the need for charging.

Does CI need an emergency power supply system?

Accreditation standards, such as IEEE 602, require CI to have an emergency power supply system (EPSS) to form a local microgrid network with local generation and automatic transfer switches, in case of sudden power blackouts of the main grid supply.

How long can a power supply last without charging?

This product can supply electricity to DC and AC appliances and power up to 100W at one time. The system can supply electricity which lasted for 2 days without the need for charging. This is sufficient enough to be used during contingency happens where the electricity interruption might happen.

Should CI use a gas/diesel generator for EPSS?

Gas/diesel generator sets are traditional choices for most CI as local energy units for EPSS due to their sustained and robust power supply capability; however, the long startup time from standby mode makes the task of a seamless and rapid power restoration of CI difficult to achieve with these sources.

Shenzhen Rocfly Blue Electronic Co., Ltd. is located in Shenzhen. We have more than 13 years of experience in the field of energy storage power supply, mainly focusing on outdoor household energy storage power supply, daily office portable energy storage, emergency energy storage power supply, solar energy storage, automobile emergency starting power supply, etc.
