

Restriction on the export of photovoltaic modules

What are China's new export restrictions on thin-film solar?

China has announced new export restrictions on materials essential for the thin-film solar industry, including critical minerals such as tungsten, tellurium, and indium. China's Ministry of Commerce and General Administration of Customs has imposed export controls on tungsten, tellurium, bismuth, molybdenum, and indium.

Will China reduce export tax rebate for solar products?

China has reduced the export tax rebate for solar products, lowering refunded taxes for Chinese PV exporters and eating into their profit margins. The move might force some companies to increase export prices to mitigate potential financial losses.

How will China's CdTe export curbs affect First Solar?

China dominates global tellurium refining and CdTe production, meaning the export curbs could tighten supply and raise prices. US-based First Solar, the world's largest producer of CdTe thin-film PV modules, could be particularly affected.

Are tariffs affecting the global solar trade?

The threat of tariffs on countries that supplied more than \$10 billion of solar products to the United States last year, accounting for the vast majority of domestic supplies, has caused a dramatic shift in the global solar trade.

Will tariffs hurt us solar producers?

Critics of the effort, including the Solar Energy Industries Association trade group, have said tariffs would harm US solar producers because they would raise prices on the imported cells that are assembled into panels by American factories.

Will China phase out export tax rebates?

Some industry analysts, who spoke to pv magazine on condition of anonymity, said the tax rebate reduction is part of a longer-term strategy. With Chinese PV products dominating global markets, they said that the government might eventually phase out export tax rebates entirely.

However, Chinese companies have continuously circumvented these restrictions through capacity transfers to Southeast Asia. In 2024, the four Southeast Asian countries accounted for more than 80% of U.S. imports of photovoltaic modules, with about 70% of this capacity dominated by Chinese companies.

How import restrictions on modules will push up solar energy tariffs in India. June 28, 2022. ... (PV) and economies of scale have triggered, and sustained, the downward pressure on module prices. Against the trend, in mid-2020, module prices began increasing globally. The price of solar (monocrystalline passivated emitter

Restriction on the export of photovoltaic modules

and rear contact type ...

Do internal and external forces affect China's solar PV export? This study examines the impact of both internal and external forces on China's solar PV export during 2007-2016. The results ...

The Indian government has reinstated the so-called Approved List of Models and Manufacturers (ALMM) mandate from April 1, 2024. The move creates a non-tariff barrier for Chinese products.

China's Ministry of Finance and State Taxation Administration have announced a reduction in the export tax rebate for photovoltaic products. ... HS Code 85414200) and assembled PV modules (HS ...

India reinstated import restrictions on solar PV cells, aiming to reduce dependency, especially on Chinese imports, amid global supply chain disruptions. India's No.1 PU & Degree With Integrated IAS & IPS(UPSC/PSC) Training College.

Under the Manufacturing and Other Operations in Warehouse Regulations (MOOWR), the CBIC allows businesses to import solar modules free of duty, manufacture solar projects, and generate power for ...

U.S.-based First Solar, the world's leading producer of CdTe thin-film PV modules, may be particularly affected. According to a research report published by Dongguan Securities on February 5, China produced 750 metric tons of refined tellurium in 2024, accounting for approximately 76.53% of global output.

From pv magazine USA. The Biden administration has imposed a series of tariffs on hardware imported from China. In the case of the solar module business, these measures serve more as a warning ...

A-570-979 (91 Documents) Date Action Title; 04/11/2025 Crystalline Silicon Photovoltaic Cells, Whether or Not Assembled Into Modules, From the People's Republic of ...

U.S.-based First Solar, the world's leading producer of CdTe thin-film PV modules, may be particularly affected. According to a research report published by Dongguan Securities on February 5, China produced 750 metric ...

The Private Power and Infrastructure Board (PPIB) has recommended imposing a 10 percent duty on the import of solar PV modules for the next 10 years and beyond. This proposal aims to boost domestic manufacturing of PV panels, as per sources familiar with the matter. The proposal, part of the "Solar Panel & Allied Equipment Manufacturing Policy 2024" ...

China's annual export of solar photovoltaic (PV) products, such as polysilicon wafers, cells, and modules, surpassed \$51 billion in 2022, a year-over-year increase of 80.3%. China's export performance is noteworthy as it has come despite the import barriers erected by several countries to restrict the entry of Chinese products

Restriction on the export of photovoltaic modules

last year.

China has announced new export restrictions on materials essential for the thin-film solar industry, including critical minerals such as tungsten, tellurium, and indium. China's Ministry of...

Duty exemption on these equipment will lower the costs for solar cell and module manufacturers. Import duty (BCD) exemption has been extended for specified goods used in the manufacture of silicon wafers, specified material for manufacture of EVA (ethylene vinyl acetate) sheets, and flat copper wire for use in the manufacture of photovoltaic ...

The Ministry of Finance and the State Administration of Taxation issued the "Announcement on Adjusting the Export Tax Rebate Policy", proposing to reduce the export ...

The import restrictions on solar PV cells are not aimed at restricting imports but are designed to boost local solar manufacturing capabilities to meet India's renewable energy goals. Impact on Project Developers: Project ...

India's Union Budget, presented this week by Finance Minister Nirmala Sitharaman, allocates an extra INR 19,500 crore (\$2.6 billion) to the production-linked incentive scheme for solar from April.

The export of solar PV cells and modules by Indian manufacturers witnessed a sharp increase to INR 8,440 crore (around \$1.03 billion) in FY2023 against INR 1,819 crore in the previous year. This was supported by increased ...

A tariff of 34.41 percent is planned for solar modules from Malaysia. Solar panels from Cambodia will be subject to an average tariff of 651.85 percent. For products from two ...

In August 2022, it set up a CdTe Accelerator Consortium (CTAC) to accelerate the development of CdTe cells with an efficiency of over 24% and module costs below \$0.20/W by 2025. It comprises the largest CdTe solar panel manufacturer in the US First Solar as one of the members (see US Laser Focused On Silicon Free PV Technology).

China recorded new highs in output value and the export of photovoltaic (PV) products in 2022, with Europe remaining the most important export market, accounting for more than 50 percent of total ...

Starting Dec. 1, the rebate for unassembled solar cells (HS Code 85414200) and assembled PV modules (HS Code 85414300) will drop from 13% to 9%. The lowered rebate will reduce refunded taxes...

Photovoltaic module import shipments by country, 2024 Imports at the national level are published in Table 6. Country of origin is not published to protect individual company data. December 2024 . U.S. Energy

Restriction on the export of photovoltaic modules

Information Administration | 2024 Monthly Solar Photovoltaic Module Shipments Report 10 .

Recent PV Facts 1/24/2025 6 (100) number of systems is now 4.8 million including plug-in solar units, with a total capacity of approximately 99 GWp [BSW]. Figure 2: Net PV additions: actual values until 2024, expansion path to achieve the legal targets

The "import restrictions" on solar PV cells. Subject: Economy. Section: External Sector. Context: The Ministry of New and Renewable Energy (MNRE) on March 29, ordered to re-implement its 2021 notification of an "Approved List of Models and Manufacturers of Solar Photovoltaic [PV] Modules", also called the ALMM list.; What is the ALMM list? Why is it being ...
