

Sydney's new outdoor power supply

What will power Sydney's future look like?

Powering Sydney's Future will secure a reliable electricity supply through economically viable solutions, with minimal community and environmental impacts. A new 20-kilometre 330kV underground cable has been installed, mostly along roads, with some work in parks.

What is the powering Sydney's future project?

The NSW Department of Planning, Industry and Environment (DPIE) approved the Powering Sydney's Future project on 14 May 2020. The project secures the electricity supply for 800,000 people working and living in Sydney's CBD and surrounding suburbs.

Why does Sydney need a reliable and affordable electricity supply?

A reliable and affordable electricity supply is essential to supporting Sydney's economy. Parts of the current electricity transmission network were built in the 1960s and 1970s and some underground cables are now approaching the end of their serviceable life.

Who is Australia's largest electricity distributor?

We are the largest distributor of electricity on Australia's east coast, providing power to 1.8 million customers; that's over 4 million Australians relying on us everyday. We provide a safe and reliable electricity supply for parts of Sydney, the Central Coast and Hunter Valley.

When will powering Sydney's future be completed?

Works commenced in August 2020, with main construction completed in July 2022 and road restoration works completed in June 2023. Powering Sydney's Future will secure a reliable electricity supply through economically viable solutions, with minimal community and environmental impacts.

Why is Ausgrid putting a new underground power cable in Artarmon?

In order to supply power to the new metro train system, Systems Connect is installing a new underground power cable from the Ausgrid substation on Carlotta Street, Artarmon, to the new substation being built on Reserve Road. Due to the nature of some activities and for the safety of workers, some work will occur outside standard construction hours.

Sydney's new metro train FACT SHEET SEPTEMBER 2017 sydneymetro 1800171 386 sydneymetro@transport.nsw.gov New power supply cable To provide a reliable source of power to the new substations, a 3.5 kilometre, high voltage electricity supply cable is proposed. It will be installed between the Campsie substation
