An Uninterruptible Power Supply (UPS) is a critical device that safeguards your electronic equipment from power interruptions, surges, and outages by providing backup power during such instances. Choosing the right UPS requires careful consideration of several factors to ensure reliable protection for your valuable devices.

Include all of the devices the UPS will need to support. If a piece of equipment has a redundant power supply, only count the wattage of ONE power supply. If you are unsure how many watts your equipment requires, consult the manufacturer or power supply specifications in the user manual. Here is an example of an equipment list to verify the load:
