

What is Vientiane solar PV Park 1?

Vientiane Solar PV Park 1 is a 200MW solar PV power project. It is planned in Vientiane, Laos. The project is currently in permitting stage. It will be developed in multiple phases. The project construction is likely to commence in 2023 and is expected to enter into commercial operation in 2022. Description

How many inverters does a solar power station have?

Equipped with everything necessary This power station is supplied totally equipped with several high-efficiency PV inverters, the LV/MV transformer, MV switchgear and LV switchgear. It can be equipped with up to two dual inverters, in both 1,000Vdc and 1,500Vdc topologies, so it covers a very wide output power range.

How many inverters does Ingeteam have?

It can be equipped with up to two dual inverters, in both 1,000Vdc and 1,500Vdc topologies, so it covers a very wide output power range. Ingeteam has developed a sand trap system to avoid the entrance of dust, sand and water. Thus, it is protected against sandstorms, so it is perfectly adapted for desert areas.

Micro-inverters enable single panel monitoring and data collection. They keep power production at a maximum, even with shading. Unlike string inverters, a poorly performing panel will not impact the energy production of other panels. Micro-inverters have more extended warranties--generally 25-years. Cons--
