How much does electricity cost in a commercial & industrial facility?

Many Commercial & Industrial (C&I) facilities have utility tariffs with both an energy (per kWh) and demand (per kW) charge component. Fixed cost is USD 5 - USD 10 /kW/month. Imagine a facility has a peak in electricity usage in the middle of the day.

How do battery energy storage systems work?

Battery energy storage systems can flatten the load profile of the facility by charging during off-peak times and discharging during the facility's peak. As a result, the facility can reduce the demand charge by 25-50%, which will reduce the facility's total electricity bill by 10-30%. *Have a connected load of >1MVA.

What is a Phi high voltage stack?

PHI High Voltage stacks feature modular battery building blocks that can be sized and scaled and installed without heavy equipment, instead of the one-size-fits-all, large, cumbersome battery banks common in other C&I offerings.
