The company's core market is on stationary storage in conjunction with Solar PV and focuses on superior products and on the incorporation of the latest technologies to battery functionality.

Lithium battery industry value analysis Global demand for Li-ion batteries is expected to soar over the next decade, with the number of GWh required increasing from about 700 GWh in 2022 to around 4.7 TWh by 2030 (Exhibit 1).

By Rafiq Raji. Introduction. A major component of an EV is the lithium-ion battery (LIB) that powers it. The pack of battery itself can make up anything between a third to half of the EV's total cost. [1] The battery cells constitute about 60-80% of the cost of the battery pack, with the battery shells, other battery modules, battery management system, on-board charger, and ...
